Has any blood relative had any of the above conditions? If yes Please list: _____

List **all medications** taken presently: _____

Any **drug allergies**? If so, please list medications.: _____

Pupil Dilation

Dilating drops last about 4 to 6 hours and allow the doctor to perform a more thorough examination of your retina (back of the eye). You may be able to drive, but it is recommended that someone else drive you home. Dilation can assist in early detection of glaucoma, cataract, retinal, and neurological diseases. **There is an extra charge of \$20 to be dilated.** We strongly recommend that you are dilated with each exam. Please indicate your preference.

I **want** to be dilated today I **want** to be dilated **later** I **do not want** to be dilated

Visual Field Screening

Visual field analysis is one of the most sensitive tests available in diagnosing conditions such as glaucoma, retinal problems, neurological diseases (brain tumors and optic nerve disease). Most visual field defects are not noticed by an individual until in the very late stages. We are committed to prevention of eye diseases as well as early detection, which significantly increases the chances of curing the disorder, or at least minimizing its effects. **A screening test can be performed in less than 10 minutes for an additional charge of \$20.** Please indicate your preference

I **want** the visual field screening test I **do not want** the visual field screening test

****NOTE****This is a screening. It is possible that an additional comprehensive visual field testing may be necessary based on the results of your vision analysis by the doctor.

PAYMENT IS EXPECTED WHEN SERVICES ARE RENDERED UNLESS OTHER ARRANGEMENTS ARE MADE IN ADVANCE.
THANK YOU. ALL PROFESSIONAL FEES ARE NON-REFUNDABLE
